Pediatr Cardiol 19:511–516, 1998

Subject Index

Abbreviations: Annotation—A; Case Report—CR; Letter to the Editor—LE

Absent pulmonary valve, percutaneous coil occlusion of PDA in absent pulmonary valve and (LE); 502
Adolescence, natural course of isolated ventricular septal defect during; 230
Adolescents, exercise tolerance and blood pressure response to exercise testing after renal transplantation in; 471
Age, right ventricular diastolic filling in normal children and; 218
variation in left ventricular myocardial contractile state related to; 463
Amiodarone, effect on tachyarrhythmias in infants and children; 445
myocardial uptake in piglet hearts; 204
Anesthesia, propofol suppresses premature atrial contractions during (LE); 272
Anomalous left coronary artery, dobutamine stress echocardiography in (CR); 178
Anomalous origin of left coronary artery, double-outlet right ventricle and (CR); 361
Anomalous origin of right pulmonary artery (AORPA) from ascending aorta, with right ventricular dysfunction diagnosed by echocardiography (CR); 425
Anomalous pulmonary venous connection, emissary veins from pulmonary venous confluence in; 195
Aortic coarctation, ductal tissue sling contributes to (CR); 182
in premature very-low-birth-weight infant treated by balloon angioplasty (CR); 418
neuroblastoma associated with (CR); 480
transcatheter treatment of; 27
Aortic root aneurysm, related to Marfan syndrome, Bentall procedure for (CR); 369
Aortic stenosis, aortic valve gradient before and after transcatheter ductal occlusion in patient with (CR); 428
congenital, historical vignette of (A); 268
Aortic valve stenosis, neonatal, transcarotid balloon valvuloplasty with continuous transesophageal ECG for; 212
Aortopulmonary collaterals, embolization therapy for; 74
unifocalization manages tetralogy of Fallot with; 289
Aortopulmonary shunts, transcatheter embolization of; 74
Arrhythmia, as complication of gram-positive sepsis (CR); 482
in infants and children, diagnosis and management of (A); 351
radiofrequency ablation technique for treatment of; 95
Arterial duct, transient left branch pulmonary stenosis caused by constriction of; 240
Arterial switch, history, surgical technique, and postoperative management of; 297
Atresia of coronary sinus, left superior vena cava associated with (CR); 352
Atrial flutter, complicating neonatal Coxsackie B2 myocarditis (CR); 185
Atrial septal defect, inverted duplication of Chromosome 16 in patients with (CR); 187
longevity of patient with complete transposition of great arteries and (CR); 358
per-catheter devices for closure of; 86 therapeutic catheterization for; 3
Atrial septostomy, state of the art and future direction of; 107
Atrioventricular block, after sickle cell crisis (CR); 171
heart tumor and AV junction associated with (CR); 263
Atrioventricular dissociation, spontaneous resolution *in utero* of (CR); 487
Atrioventricular septal defect, common and partial, review of operative repair techniques for; 276
cor triatriatum and (CR); 243
Atrioventricular valve, right atrial isomerism and morphology of (LE); 501

Balloon angioplasty, aortic coarctation treated by; 27
of aortic coarctation in very-low-birth-weight infant (CR); 418
state of the art and future direction of; 107
stent placement and balloon bursting during (A); 66
venous stenosis treated by; 59
Balloon dilatation, pulmonary artery stenosis treated by; 48
unoperated coarctation of aorta treated by; 27
Balloon pulmonary valvuloplasty, effect on infundibular septum of tetralogy of Fallot patients; 155
for valvar stenosis; 18
Balloon valvuloplasty, state of the art and future direction of; 107
transcarotid, with continuous transesophageal ECG, for neonatal aortic valve stenosis; 212
Becker's muscular dystrophy, left ventricular function and; 139
multigated radionuclide ventriculography vs. echocardiography for detecting cardiac involvement in; 150
Bentall procedure, aortic root aneurysm related to Marfan syndrome treated by (CR); 369
Blalock–Taussig shunt, prostaglandin E for increasing pulmonary arterial diameter for; 404
stage I palliation for hypoplastic left heart syndrome; 458
Blunt force chest trauma, child homicide caused by (CR); 436

Book review, "Perspective in Pediatric Cardiology, Vol. 5," edited by Ferencz et al. (A); 435
"Perspective in Pediatric Cardiology, Vol. 6," edited by J.H. Moller (A); 438
"Science and Practice of Pediatric Cardiology," edited by Garson et al.; (A)
"The Developing Heart," edited by Ostadal et al. (A); 417
Bronchopulmonary dysplasia, in preterm infants, role of patent ductus arteriosus on; 225

Calcium handling, in neural crest cardiovascular defects (A); 170
Cardiac concussion, child homicide caused by (CR); 436
Cardiac morphogenesis, role of transcription factors dHAND and eHAND in (A); 160
Cardiac myocytes, rapamycin inhibits growth of; 468
Cardiac tamponade, neonatal intrapericardial lymphangioma presenting as (LE); 192
neonatal, recurrent congenital left atrial aneurysm presenting as (CR); 165
Cardiac tumor, at AV junction associated with AV block (CR); 263
Cardiomegaly, from severe regurgitation, lung hypoplasia in neonates with; 133
Cardiomyopathy, dilated, chronic myocarditis clinically presenting as; 235
hypertrophic, mitochondrial DNA depletion and respiratory enzyme defects associated with (CR); 266
hypertrophic, myocardial ischemia as cause of (LE); 374
hypertrophic, transvenous dual chamber (DDD) pacing in infant with (CR); 253
Cardiopulmonary bypass, cerebral injury from deep hypothermia during; 398
in children with congenital heart disease, cerebral embolic injury and; 321
intraoperative transesophageal echocardiography assesses cardiac defects after; 346
neurological complications from; 331
Catheterization, papaverine to prevent loss of femoral artery pulse in; 390
pulmonary artery stenosis treated by; 48
pulmonary embolism in neonate during (CR); 431
radiofrequency ablation and; 95
therapeutic, history of uses of; 3
therapeutic, implications of managed care for; 9
therapeutic, innovative approaches to (A); 26
therapeutic, state of the art and future direction of; 107
Cerebral blood flow, effect of pump flow during cardiopulmonary bypass on; 331
Cerebral injury, during cardiopulmonary bypass and deep hypothermia; 321
from deep hypothermia during cardiopulmonary bypass; 398
role of hypothermia for cardiopulmonary bypass and circulatory arrest in; 331
Cerebral ischemia, deep hypothermic, circulatory arrest during cardiopulmonary bypass and; 321
role of hypothermia for cardiopulmonary bypass in; 331
Chronic animal model, time course of myocardial amiodarone; 204
Ciliary dyskinesia, congenital heart disease and (LE); 191
Circulatory arrest, deep hypothermic, for correction of congenital cardiac anomalies, brain injury from; 321
deep hypothermic, vs. continuous low flow for cardiopulmonary bypass; 331
Coarctation, aortic, ductal tissue sling contributes to (CR); 182
in premature very-low-birth-weight infant treated by balloon angioplasty (CR); 418
neuroblastoma associated with (CR); 480
transcatheter treatment of; 27
Coil embolization, superior vena cava to pulmonary vein fistulae treated by (CR); 363
Commotio cordis, child homicide caused by (CR); 436
Computed tomography, of constrictive pericarditis (CR); 259
Congenital aneurysm, of muscular interventricular septum (CR); 249
Congenital heart disease, ancient observations of (A); 173
CD-ROM visualizing (A); 281
cyanotic, increase in pulmonary arterial diameter with PGE therapy in infants with; 404
intraoperative transesophageal echocardiography assesses operative results for; 346
platinum microcoils to embolize vascular abnormalities in; 145
primary ciliary dyskinesia and (LE); 191
Cor triatriatum, atrioventricular septal defect and (CR); 243
Coronary artery fistula, myocardial infarction after surgical repair of (CR); 366
transcatheter embolization for; 74
Coxsackie B2 myocarditis, neonatal, atrial flutter complicating (CR); 185
Cyanosis, in neonate after transvenous pacing wire placement (CR); 168
Cyanotic congenital heart disease, increase in pulmonary arterial diameter with PGE therapy in infants with; 404

DDD pacing, in infant with hypertrophic cardiomyopathy (CR); 253
Dexamethasone, patent ductus arteriosus in low-birth-weight infants treated by; 225
Diastolic filling, effect of abnormal long axis function after repaired tetralogy on; 128
Diastolic function, effect of doxorubicin on; 450
Dobutamine stress echocardiography, left ventricular function in anomalous left coronary artery patients evaluated by (CR); 178

Double inlet/double outlet left ventricle, in situs inversus (CR); 161
Double outlet right ventricle, anomalous origin of left coronary artery from right pulmonary artery associated with (CR); 361
neural crest ablation and (A); 190
restrictive ventricular septal defect and (CR); 490
Doxorubicin, effect on diastolic function, contractile reserve, and ventricular–vascular coupling; 450
Duchenne's muscular dystrophy, left ventricular function and; 139
multigated radionuclide ventriculography vs. echocardiography for detecting cardiac involvement in; 150
Ductus arteriosus, coarctation of aorta and closure of (CR); 182
Duplication 16p, pulmonary vascular disease and (CR); 187

Ebstein's anomaly, lung hypoplasia in neonates with; 133
nitric oxide inhalation by neonate with (CR); 477
Echocardiography, aneurysmal enlargement of right atrium seen in (CR); 420
AORPA with right ventricular dysfunction in neonate diagnosed by (CR); 425
cardiac function in muscular dystrophy patients evaluated by; 150
dobutamine stress, left ventricular function in anomalous left coronary artery patients evaluated by (CR); 178
Doppler, neonatal pulmonary hypertension evaluated by (LE); 439
Doppler, of right ventricular diastolic function; 218
intraoperative transesophageal, residual cardiac defects assessed by; 346
left ventricular function in muscular dystrophy patients evaluated by; 139
transesophageal, neonatal critical aortic valve stenosis treated with balloon valvuloplasty with; 212
Electrocardiography, regression of RV dominance seen by QRS patterns in; 197
Ellis–van Creveld syndrome, hexodactily syndrome and single atrium as (LE); 440
Embolization coil occlusion, patent ductus arteriosus treated by; 67
Embolization therapy, materials, methods, applications, and results of; 74
state of the art and future direction of; 107
Embryology, pericardial defect from tear rather than persistence in pericardio–pleural membrane challenges theory of; 414
Emissary veins, veins from pulmonary venous confluence in anomalous pulmonary venous connection named; 195
Emphysema, subcutaneous, subatmospheric oxygen therapy for hypoplastic left heart syndrome as cause of (CR); 422
End-systolic meridional stress (ESS)/rate-corrected velocity of circumferential fiber shortening (VCFc) relation, left ventricular myocardial contractile state expressed by; 463
Eustachian valves, in infants, clinical course and management of; 221
Exercise, after Fontan operation and right ventricular outflow tract reconstruction, plasma norepinephrine and heart rate response during; 408
tolerance of and blood pressure response to, after renal transplantation; 471

Femoral arterial spasm, use of papaverine after cardiac catheterization to decrease incidence of; 390
Fetus, spontaneous resolution of atrioventricular dissociation in (CR); 487
Fontan circulation, late attrition of; 316
Fontan procedure, development of superior vena cava to pulmonary vein fistulae after (CR); 363
plasma norepinephrine and heart rate during exercise after; 408
protein-losing enteropathy reversed by fenestration of (CR); 355
third stage of reconstruction procedure for hypoplastic left heart syndrome; 308
Foramen ovale, premature closure of in presence of transposition of great arteries (CR); 246

Germ cell tumor, intracardiac, histopathology and immunohistochemistry of (CR); 495
Gram-positive sepsis, left ventricular dysfunction and arrhythmia as complications of (CR); 482

Health care, fiscal and regulatory issues of; 9
Heart rate, effect of exercise after Fontan operation and right ventricular outflow tract reconstruction on; 408
Heart transplantation, rapamycin inhibits cardiac myocyte proliferation in; 468
Hemi-Fontan procedure, second stage of reconstruction procedure for hypoplastic left heart syndrome; 308
Hemiparesis, primary mitral valve sarcoma in infant with (CR); 174, (LE) 193
Hexodactily, single atrium and (LE); 440
Hypertension, during exercise after renal transplantation; 471
Hypertrophic cardiomyopathy, mitochondrial DNA depletion and respiratory enzyme defects associated with (CR); 266
myocardial ischemia as cause of (LE); 374
transvenous dual chamber (DDD) pacing in infant with (CR): 253
Hypocalcemia, in neural crest cardiovascular defects (A); 170
neural crest cardiovascular defects and (A); 164

Hypoplastic left heart syndrome, innominate artery steal syndrome after stage I palliation for; 458
staged reconstruction for; 308
subcutaneous emphysema caused by subatmospheric oxygen therapy for (CR); 422
Hypothermia, brain injury during cardiopulmonary bypass with circulatory arrest by; 321
during cardiopulmonary bypass, cerebral injury from; 398

Immunosuppressive therapy, chronic myocarditis in children treated with; 235
Indomethacin, PDA in advanced postnatal age infant closed with (CR); 256
Infants, amiodarone and propranolol for therapy for tachyarrhythmias in; 445
transvenous DDD pacing for hypertrophic cardiomyopathy in (CR); 253
Inferior vena cava, anomalous insertion into right atrium (CR); 474
transcatheter management of obstruction of; 59
Infundibular septum, of tetralogy of Fallot, histopathologic changes in, after balloon pulmonary valvuloplasty; 155
Innominate artery steal syndrome, after stage I palliation for hypoplastic left heart syndrome; 458
Intact ventricular septum, percutaneous coil occlusion of PDA in absent pulmonary valve and (LE); 502
Interventional cardiology, history of therapeutic catheterization as; 3
role of transcatheter embolization in; 74
state of the art and future direction of; 107
use of platinum microcoils in; 145
Interventricular septum, muscular, familial occurrence of congenital aneurysm of (CR); 249
Intracardiac mass, diagnosed as malignant germ cell tumor with yolk sac differentiation (CR); 495
Intrapericardial lymphangioma, presenting as neonatal cardiac tamponade (LE); 192

Left atrium, neonatal, recurrent congenital aneurysm in (CR); 165
Left pericardial defect, from tear in pericardio–pleural membrane challenges embryonic theory; 414
Left superior vena cava, accessory, as drainage route from coronary sinus, angiographic and hemodynamic features of (CR); 352
Left ventricle, double inlet/double outlet, in situs inversus (CR); 161
Left ventricular contractile state, expressed as stress velocity relation; 463
Left ventricular dysfunction, as complication of gram-positive sepsis (CR); 482
Left ventricular function, assessed by MUGA vs. echocardiography in MS patients; 150
dobutamine stress echocardiography of (CR); 178
X-chromosomal (p21) muscular dystrophy and; 139
Left ventricular outflow tract (LVOT) obstruction, associated with PDA, hemodynamic effects of aortopulmonary shunts on (CR); 428
DORV with restrictive ventricular septal defect causing (CR); 490
Long axis function, after repair of tetralogy of Fallot; 128
Lung hypoplasia, in neonates with tricuspid valve disease and cardiomegaly; 133

Magnetic resonance imaging, aneurysmal enlargement of right atrium seen in (CR); 420
of constrictive pericarditis (CR); 259
Marfan syndrome, surgical treatment of aortic root aneurysm related to (CR); 369
Microcoils, platinum, vascular abnormalities in congenital heart disease treated by; 145
Mitochondrial DNA depletion, hypertrophic cardiomyopathy with (CR); 266
Mitral valve sarcoma, in infant with hemiparesis and heart murmur (CR), 174; (LE) 193
Multigated radionuclide ventriculography (MUGA), cardiac function in muscular dystrophy patients evaluated by; 150
Muscular dystrophy, multigated radionuclide ventriculography vs. echocardiography for detecting cardiac involvement in; 150
X-chromosomal, left ventricular function and; 139
Myocardial contractility, assessed by ESS/VCFc relation in different age groups; 463
Myocardial contraction, effect of doxorubicin on; 450
Myocardial infarction, after surgical repair of congenital coronary artery fistula (CR); 366
Myocarditis, chronic, immunosuppressive therapy for; 235
respiratory syncytial virus bronchiolitis in patient with (CR); 498

Neonate, AORPA with right ventricular dysfunction diagnosed by echocardiography in (CR); 425
arterial duct constriction and murmurs in; 240
atrial flutter complicating Coxsackie B2 myocarditis in (CR); 185
balloon dilation for aortic coarctation in; 27
cyanosis in, after transvenous pacing wire placement (CR); 168
ductal tissue sling caused aortic coarctation in (CR); 182
ECG evaluated pulmonary hypertension in (LE); 439
inhaled NO therapy for Ebstein's anomaly in (CR); 477
intrapericardial lymphangioma presenting as cardiac tamponade in (LE); 192
lung hypoplasia of tricuspid valve disease in; 133
premature closure of foramen ovale as cause of death of (CR); 246
pulmonary embolism during cardiac catheterization in (CR); 431
recurrent congenital left atrial aneurysm in (CR); 165

transcarotid balloon valvuloplasty with transesophageal ECG for critical aortic valve stenosis; 212
Neural crest ablation, double outlet right ventricle and tetralogy of Fallot and (A); 190
Neural crest cardiovascular defects, association with life-threatening problems (A); 164
hypocalcemia and impaired calcium handling in (A); 170
Neuroblastoma, aortic coarctation associated with (CR); 480
Nitric oxide inhalation, effect on neonate with Ebstein's anomaly (CR); 477
Norwood procedure, first stage of reconstruction procedure for hypoplastic left heart syndrome; 308

Papaverine, to prevent loss of femoral artery pulse in cardiac catheterization; 390
Patent ductus arteriosus, aortic valve gradient before and after transcatheter ductal occlusion in patient with (CR); 428
bronchopulmonary dysplasia in very-low-birth-weight infants caused by; 225
closed with indomethacin in infant of advanced postnatal age (CR); 256
history vignette on closure of (A); 245
neonatal, effect of dexamethasone on; 225
percutaneous coil occlusion of (LE); 502
transcatheter management of; 67
Peak systolic wall stress, calculated from echocardiogram of X-chromosomal muscular dystrophy patients; 139
Pediatric cardiology, effect of managed health care on; 9
science and practice of, book review; (A)
teaching and evaluation in (A); 320
Per-catheter closure devices, for atrial septal defect, review of; 86
Percutaneous coil occlusion, of ductus arteriosus in absent pulmonary valve and intact ventricular septum (LE); 502
Pericarditis, constrictive, CT and MRI findings of (CR); 259
Pharmacokinetics, of single-dose amiodarone in piglet myocardium; 204
Phrenic nerve, complete left pericardial defect with dual passage of; 414
Physicians, role in managed health care; 9
Piglet heart, effect of doxorubicin on diastolic function and myocardial contraction in; 450
pharmacokinetics of amiodarone uptake in myocardium in; 204
Plasma norepinephrine, effect of exercise after Fontan operation and right ventricular outflow tract reconstruction on; 408
Primary cardiac tumor, in infant with hemiparesis and heart murmur (CR); 174; (LE); 193
Propofol, premature atrial contractions during anesthesia suppressed by (LE); 272
Propranolol, effect on tachyarrhythmias in infants and children; 445
Prostaglandin E, coarctation of aorta treated by (CR); 182
effect on pulmonary arterial diameter; 404
Protein-losing enteropathy, fenestration of extracardiac Fontan procedure reverses (CR); 355
Pulmonary artery, effect of prostaglandin E therapy on diameter of; 404
Pulmonary artery stenosis, ductal constriction and; 240
etiology and catheterization treatment of; 48
Pulmonary atresia, with intact ventricular septum, morphology of tricuspid valve in; 381
with intact ventricular septum, ventriculo–coronary arterial connections and (CR); 269
Pulmonary embolus, cardiac catheterization in neonate caused (CR); 431
Pulmonary hypertension, inverted duplication of short arm of Chromosome 16 and (CR); 187
neonatal, Doppler echocardiography of (LE); 439
Pulmonary stenosis, neonatal, balloon pulmonary valvuloplasty for; 18
Pulmonary vascular disease, nonreactive, in patients with dup 16p and ASD and VSD (CR); 187
Pulsatility index, correlates with pulse after cardiac catheterization; 390

QRS patterns, regression of RV dominance seen in; 197

R waves, right precordial notched, show involution of RV dominance in infancy; 197
Radiofrequency ablation, cardiac arrhythmia treated by; 95
Rapamycin, heart cell growth inhibited by; 468
Renal transplantation, exercise tolerance and blood pressure response to exercise testing after; 471
Respiration, right ventricular diastolic filling in normal children and; 218
Respiratory enzyme defects, hypertrophic cardiomyopathy with (CR); 266
Respiratory syncytial virus, myocarditis complicated by ventricular tachycardia in patient with (CR); 498
Rhabdomyoma, cardiac, at AV junction associated with AV block (CR); 263
Right atrial isomerism, morphology of atrioventricular valve and (LE); 501
Right atrium, aneurysmal enlargement of (CR); 420
anomalous insertion of superior and inferior vena cava into (CR); 474
Right ventricle, double-outlet, anomalous origin of left coronary artery from right pulmonary artery associated with (CR); 361
Right ventricular development, tricuspid valve morphology in PAIVS correlates with; 381
Right ventricular diastolic function, effects of age and respiration on; 218
Right ventricular dominance, right ventricular conduction delay during regression of; 197

Right ventricular dysfunction, in neonate with aortic origin of right pulmonary artery (CR); 425
Right ventricular myocardial sinusoidal–coronary artery connections, hypoplastic right ventricle and pulmonary valve stenosis associated with (CR); 269
Right ventricular outflow tract reconstruction, plasma norepinephrine and heart rate during exercise after; 408
Right ventricular restriction, impaired long axis function in patients with, following repair of tetralogy; 128
Risk-averse behavior, of physicians, effect of managed health care on; 9

Sickle cell disease, transient second degree atrioventricular block after (CR); 171
Situs inversus, double inlet/double outlet left ventricle in (CR); 161
Staged reconstruction, for hypoplastic left heart syndrome, status of; 308
Stents, endovascular, coarctation of aorta treated with; 27
endovascular, placement after balloon burst (A); 66
endovascular, venous stenosis treated by; 59
intravascular, state of the art and future direction of; 107
pulmonary artery stenosis treated by; 48
Sudden death, caused by cardiac concussion to child (CR); 436
Superior vena cava, anomalous insertion into right atrium (CR); 474
transcatheter management of obstruction of; 59
Superior vena cava to pulmonary vein fistulae, after modified Fontan procedure, embolization therapy for (CR); 363
Supplemental nitrogen, subcutaneous emphysema and (CR); 422
Supraventricular tachycardia, effect of amiodarone and propranolol on; 445

Tachyarrhythmia, effect of amiodarone and propranolol on; 445
Tachycardia, radiofrequency ablation technique for treatment of; 95
Tetralogy of Fallot, biventricular long axis function after repair of; 128
changes in infundibular septum of, after balloon pulmonary valvuloplasty; 155
neural crest ablation and (A); 190
palliative pulmonary valvuloplasty for; 18
with major aortopulmonary collaterals, unifocalization for management of; 289
Transcatheter ductal occlusion, pressure gradient in patients with patent ductus arteriosus after (CR); 428
Transcatheter embolization, materials, methods, applications, and results of; 74
state of the art and future direction of; 107
vascular abnormalities in congenital heart disease treated by; 145
Transcatheter management, of patent ductus arteriosus; 67
of venous stenosis; 59
Transcription factors dHAND and eHAND, role in cardiac morphogenesis (A); 160
Transesophageal echocardiography, intraoperative, residual cardiac defects assessed by; 346
Transposition of great arteries, longevity with surgical intervention in (CR); 358
premature closure of foramen ovale with (CR); 246
with intact ventricular septum, arterial switch for repair of; 297
Tricuspid regurgitation, after transvenous pacing wire placement (CR); 168
Tricuspid valve, in pulmonary atresia with intact ventricular septum, morphology of; 381
Tricuspid valve dysplasia, lung hypoplasia in neonates with; 133

Unifocalization, tetralogy of Fallot with major aortopulmonary collaterals managed by; 289

Valved conduits, indications for use, longevity, and replacement of; 282
Venous stenosis, transcatheter management of; 59
Ventricular arrhythmia, complication of respiratory syncytial viral infection (CR); 498
Ventricular septal defect, double-outlet right ventricle and (CR); 490
inverted duplication of Chromosome 16 in patients with (CR); 187
natural course of during adolescence; 230
Ventricular septum, intact, arterial switch for repair of transposition of great arteries with; 297
intact, premature foramen ovale closure with transposition of great arteries and (CR); 246
intact, tricuspid valve morphology in pulmonary atresia with; 381
Ventricular tachycardia, effect of amiodarone and propranolol on; 445
Ventricular–vascular coupling, effect of doxorubicin on; 450
Very-low-birth-weight infant, balloon angioplasty of aortic coarctation in (CR); 418
closure of PDA by indomethacin in (CR); 256
effect of dexamethasone therapy on patent ductus arteriosus in; 225

Wolff–Parkinson–White syndrome, radiofrequency ablation technique of treatment of; 95

Pediatr Cardiol 19:517–520, 1998
